Calliham's Mill (Stone's Mill) (Park's Mill) (Price's Grist Mill)

HAER No. SC- 15

Location: Two miles east of Parksville, on Steven's Creek, left off Highway 23-221 onto South Carolina Road 138; two miles to Steven's Creek  
Parksville vicinity, McCormick County, South Carolina

Date of Construction: 1898

Engineer/Builder:

Present Use: Grist mill

Significance: Calliham's Mill is a valuable example of a working relationship between processes of the 19th and 20th centuries. It remains a physical document of methods which first produced the staple of a growing nation, and is one of the few remaining waterpowered grist mills still in use in South Carolina. The miller was an essential element in the economy of the 20th century rural South.

Constructed of pine, this two-story structure was powered by a turbine which turns a driveshaft, powering the gears which rotate the mill stones.

Calliham's Mill was listed in the National Register of Historic Places on November 22, 1987

Source of Information: National Register of Historic Places Nomination Form

Compilers: Nancy B. Pittenger and J. Tracy Power
